

### Leader No.1 f1 (Edible Type)

Late maturing hybrid variety, the total growing period is about 110 days. Flat leaves are deep green color, oval shape, plant has about 30 leaves. Plant is about 200cm in height, flower head is about 20cm in diameter. Black seeds have white stripes.

Suitable for planting in frost day >120 days and accumulated temperature over 10 °C is more than 2,300°C.

### Braves f1 (Edible Type)

Med-early maturing hybrid variety. Total growing period is 98 days from sowing to harvesting. Plant is 180cm in height. Dark grey seeds with white edge.

Strong plants have good tolerance to drought, barren and saline alkali field condition cultured. Suitable planted in accumulated temperature over 10 °C more than 2,100°C region.

Aladdin No.25 hybrid f1 (oil type)

Plants are short and strong,100-120cm in height. Big head is about 17-22cm in diameter. Stem is thickness,internodes are short,strong lodging-resistant; Stout leaves are deep green.

Harvesting is 115 days after sowing in Spring season and 98-100days in summer season sowing.

Great suitable ability, strong disease resistance, tolerance to drough, infertile and Saline alkali land.

Yield is about 1400-2000kgs/acre. Oils content is 45-50%.

Aladdin No.28 hybrid f1 (oil type)

Harvesting is 103 days after sowing. Uniform plants are 170 cm in height, 29 leaves per plant. Green leaf has more and wide leaf fissures. Single head is 20cm in diameter, head center is slight bulge.Oil Content is 50.1%,yield is 1,600~1,820kgs/acre.

Good tolerance to Black spot disease, Rhizoctonia solani, medium tolerance to Disk rot type sclerotinia disease,Root rot type sclerotinia diseases and Verticillium wilt .
